

PARENT INFO

Parents play the most important role in their child's driving experience. Ultimately it is your decision when your child gets their license and what rules and restrictions, in addition to state laws, that you will have your child follow.

If this is your first child or your fifth child to go through Driver's Education you have started in the right place!

There are several things to consider when making educational choices for your child. The quality of the program should be foremost. At the Academy, we keep our program current and fresh as we stress the key points of managing space, speed and visibility along with defensive driving techniques.

Flexibility is another consideration. Students today are often involved in several activities outside of school and scheduling can be complicated. Our program has the most flexible class schedule of any program in the area.

An obvious consideration would be cost. This is usually the first question we are asked regarding our program. The tuition for our program is \$345 with payment options available.
